

Ferhat Daoud

Full-Stack Developer — MERN / PERN

dunosixen@gmail.com | github.com/ferhatdaoud | [LinkedIn](#) | [TaskFlow \(live demo\)](#) | Ksar El Boukhari, Algeria | +213 669 441 930

TECHNICAL SKILLS

Languages: JavaScript (ES6+)

Markup & Styling: HTML5, CSS

Frontend: React, TanStack Query, React Hook Form, Zod, Tailwind CSS, shadcn/ui, Responsive Design

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, bcrypt

Databases: MongoDB, Mongoose, PostgreSQL

Tools: Git, GitHub, Vite, ESLint, npm

Currently learning: *Advanced SQL, Data Modeling, System Design Fundamentals*

PROJECTS

TaskFlow — Full-Stack Kanban Task Manager *(React, Node.js, Express, MongoDB, JWT)*

- Built the frontend with HTML, CSS, JavaScript, React, and Tailwind CSS to give teams a visual Kanban board, cutting the time it takes to see what's in progress at a glance.
- Developed backend REST APIs with Node.js, Express, and MongoDB, and secured user accounts with JWT authentication, removing the need for manual, unsecured login handling.
- Modeled data with MongoDB, Mongoose, and CRUD REST endpoints for tasks, comments, and archiving, replacing the need to track progress in spreadsheets or sticky notes.
- Used TanStack Query, React Hook Form, and Zod to keep the interface responsive and catch invalid input immediately, cutting down on failed submissions and page reloads.

Craftsman Booking Marketplace — *In Progress* *(React, React Router, PostgreSQL, TypeORM)*

- Building the frontend with React, React Router, and TanStack Query to let clients search, filter, and book local service providers without a phone call.
- Designing the backend with PostgreSQL, SQL, and TypeORM to model relationships between users, services, and bookings, reducing double-bookings and scheduling conflicts.

EDUCATION

Technicien Supérieur en Contrôle Qualité Agroalimentaire

National Institute of Agriculture, Ksar El Boukhari — 2017 to 2020
